Download the guide 2019 Mitsubishi MirageManual DescriptionEach tires, including spare tires, must be checked monthly when cold and inflated to inflationary pressures recommended by the vehicle manufacturer on the vehicle's poster or tire inflation pressure label. (If your car has tyres of a different size than the size indicated on the vehicle poster or the tire pressure label, you should determine the proper tire inflation pressure for these tires.) As an additional safety feature, your car has been equipped with a tyre pressure monitoring system (TPMS) that illuminates low tyre pressure when one or more of your tyres are significantly undercharging. Accordingly, when the low pressure in the tires brightens up, you should stop and check your tires as soon as possible and inflate them to proper pressure. Driving on a significantly bewildered tyre causes tyres to overheat and can cause tyre failure. The underemplate also reduces the fuel efficiency and life of the tire tread, and can affect the vehicle's handling and ability to stop. Please note that TPMS is not a substitute for proper tyre maintenance, and it is the driver's responsibility to maintain the correct tyre pressure, even if the under-inflation has not reached the level to cause the TPMS lighting of low pressure in the tyre telltale. Download the 2013 Mitsubishi MirageManual Description Description When it's hard to earn an engine: After several attempts, you can experience that the engine is still not working. 1. Make sure that all electrical devices, such as lamps, blowers and rear window demister, are off. When the brake pedal is depressing on vehicles equipped with CVT or clutch pedal on vehicles equipped with manual transmission, press the accelerator pedal halfway and hold it there and then crank the engine. Release the accelerator pedal immediately after the start of the engine. 3. If the engine still does not start, the engine may be flooded with too much gasoline. While the depressing brake pedal on vehicles equipped with CVT or clutch pedal, but do not press the accelerator pedal. Release the ignition key if the engine starts. If the engine does not start, repeat these procedures. If the engine is still not starting, we recommend that you check the vehicle. Funkz's Word and Google.
